RALPH LAUREN REPORTS BETTER-THAN-EXPECTED THIRD QUARTER FISCAL 2014 EARNINGS PER DILUTED SHARE OF \$2.57

- Third Quarter Net Revenues Increased 9% to \$2.0 Billion
- Earnings Per Diluted Share Increased 11% to \$2.57 in the Third Quarter
- The Company Raises its Fiscal 2014 Revenue Outlook to the Top End of its Previous Guidance Range
- The Company's Board of Directors Authorizes an Additional \$500 Million Stock Repurchase Program

NEW YORK--(BUSINESS WIRE)—February 5, 2014-- Ralph Lauren Corporation (NYSE:RL) today reported net income of \$237 million, or \$2.57 per diluted share, for the third quarter of Fiscal 2014, compared to net income of \$216 million, or \$2.31 per diluted share, for the third quarter of Fiscal 2013.

The Company's Board of Directors authorized an additional \$500 million stock repurchase program permitting the Company to purchase shares of Class A Common Stock, subject to market conditions. This amount is in addition to the \$230 million available at the end of the third quarter of Fiscal 2014 as part of a previously authorized stock repurchase program, bringing the Company's total current authorizations to \$730 million.

"We've accomplished a lot in the first nine months of the year," said Ralph Lauren, Chairman and Chief Executive Officer. "The accelerated revenue and profit growth we achieved this quarter across all markets is a tribute to the enduring strength and global appeal of the World of Ralph Lauren. Momentum was strong across our diverse brand portfolio that includes the pinnacle of luxury with Ralph Lauren Collection and Purple Label, as well as Polo, Denim & Supply, Chaps and Club Monaco. We are excited to build on that momentum by continuing to expand in new categories, like our growing accessories business, and launching women's Polo, which will be heralded into the market when we open our Fifth Avenue Polo flagship in New York later this year. I am confident we have the right strategies to accomplish our goals and I couldn't be more optimistic about the prospects ahead."

"We set aggressive goals for the third quarter and we are proud to have achieved them in the context of such a challenging operating environment," said Jacki Nemerov, President & Chief Operating Officer. "Strong international and e-commerce growth is a clear demonstration that our sustained investment in the business is paying off. The allure of our products, the distinctiveness of our in-store customer experience and the effectiveness of our marketing and advertising efforts are a winning combination, especially when matched with the disciplined operational management of our global teams. We intend to maximize these competitive advantages as we continue to make prudent investments in emerging merchandise categories and regions, in new stores, ecommerce platforms, and in our infrastructure."

#### Third Quarter Fiscal 2014 Income Statement Review

*Net Revenues.* Net revenues for the third quarter of Fiscal 2014 rose 9% to \$2.0 billion. Excluding the net negative impact from foreign currency translation and discontinued businesses, net revenues increased approximately 11%. Revenue growth was broad-based, with the

Americas, Europe and Asia all reporting high single digit increases or better in constant currency.

- Wholesale Sales. Wholesale segment sales grew 14% to \$840 million in the third quarter of Fiscal 2014. Wholesale revenue growth was primarily a
  result of strong momentum in core North American merchandise categories, the contribution from the newly transitioned Chaps menswear
  operations and improved trends in Europe.
- Retail Sales. Retail sales rose 6% to \$1.1 billion in the third quarter, reflecting the incremental contribution from new stores, including newly transitioned operations in Australia/New Zealand, and comparable store sales growth that was partially offset by the net negative impact of foreign currency translation. Excluding the impacts of discontinued businesses and foreign currency effects, retail sales rose 10% from the prior year period. Consolidated comparable store sales increased 1% on a reported basis and 2% in constant currency during the third quarter.
- Licensing. Licensing revenues of \$45 million in the third quarter were 12% below the prior year period as higher licensing revenues for Ralph Lauren products were more than offset by lower Chaps and Australia/New Zealand licensing revenues due to recent license take-backs.

*Gross Profit.* Gross profit for the third quarter of Fiscal 2014 increased 7% to \$1.2 billion. Gross profit margin of 58.2% was 110 basis points lower than the comparable prior year period, primarily due to the mix impact from the integration of the Chaps menswear operations and unfavorable foreign currency dynamics that more than offset improved profitability in core operations.

**Operating Expenses.** Operating expenses of \$838 million in the third quarter were 6% greater than the prior year period, reflecting overall business expansion and continued investment in the Company's strategic growth initiatives. Operating expense rate of 41.6% was 120 basis points lower than the third quarter of Fiscal 2013 as disciplined operational management provided strong expense leverage on accelerated revenue growth.

*Operating Income.* Operating income rose 10% to \$334 million in the third quarter of Fiscal 2014. Operating margin of 16.6% was 10 basis points greater than the third quarter of Fiscal 2013 as the decline in gross profit margin was more than offset by operating expense leverage.

- Wholesale Operating Income. Wholesale operating income increased 16% to \$168 million in the third quarter of Fiscal 2014. Wholesale operating margin improved 20 basis points to 19.9% as improved profitability in certain core operations was partially offset by the mix impact from the integration of Chaps men's sportswear and net negative foreign currency effects.
- *Retail Operating Income.* Retail operating income of \$223 million in the third quarter of Fiscal 2014 was 11% higher than the prior year period and retail operating margin improved 90 basis points to 19.8%. The improvement in retail segment profitability was

## achieved despite increased expenses associated with the Company's global store and e-commerce development efforts.

— *Licensing Operating Income*. Licensing operating income of \$34 million was 8% below the prior year period due to lower licensing revenues.

*Net Income and Diluted EPS.* Net income for the third quarter of Fiscal 2014 was \$237 million, 10% higher than the \$216 million achieved in the comparable period of Fiscal 2013, and net income per diluted share increased 11% to \$2.57 from \$2.31 for the same time period. The growth in net income and net income per diluted share was principally the result of higher operating income, as the effective tax rate of 27% was in line with the prior year period.

#### Third Quarter Fiscal 2014 Balance Sheet and Cash Flow Review

The Company ended the third quarter with \$1.4 billion in cash and investments, or \$1.1 billion in cash and investments net of debt ("net cash"), both of which were in line with the comparable prior year period. The third quarter ended with inventory of \$1.1 billion compared to \$981 million in the comparable prior year period. The growth in inventory primarily reflects the integration of formerly licensed operations as directly operated businesses; inventory for new stores and e-commerce operations; and investment to support anticipated sales growth.

The Company had \$81 million in capital expenditures in the third quarter of Fiscal 2014, compared to \$78 million in the prior year period. The Company repurchased approximately 1.1 million shares of Class A Common Stock during the third quarter.

#### **Global Retail Store Network**

The Company ended the third quarter of Fiscal 2014 with 435 directly operated stores, comprised of 136 Ralph Lauren stores, 63 Club Monaco stores and 236 Polo factory stores. The Company also operated 518 concession shop locations worldwide at the end of the third quarter. In addition to Company-operated locations, international licensing partners operated 57 Ralph Lauren stores and 13 dedicated shops, as well as 105 Club Monaco stores and shops at the end of the third quarter.

#### Fiscal 2014 Outlook

In the fourth quarter of Fiscal 2014, the Company expects consolidated net revenues to increase by 10%-12%, including an approximate 100 basis point net negative impact from foreign currency translation and discontinued businesses. Operating margin for the fourth quarter of Fiscal 2014 is expected to improve 50-90 basis points from the 11.1% achieved in the comparable prior year period as a lower gross margin is more than offset by anticipated operating expense leverage despite continued investments to support the Company's strategic growth objectives. The fourth quarter tax rate is estimated at 30%.

The Company is raising its full year, Fiscal 2014 revenue outlook to 7% growth, which is the high end of the previous 5%-7% range and includes an approximate 150-200 basis point net negative impact from foreign currency translation and discontinued businesses. Based on the anticipated fourth quarter margin dynamics, operating margin for Fiscal 2014 is expected to be 110-120 basis points below the prior year's record 16.2%, which compares to the prior outlook

of an approximate 75 basis point contraction. As a reminder, the anticipated decline in Fiscal 2014 operating margin is primarily due to the integration of certain formerly licensed merchandise categories and geographic regions to directly controlled operations, accelerated investment in the Company's long-term growth initiatives and unfavorable foreign currency effects. The full year Fiscal 2014 tax rate is currently estimated at 29% compared to a prior expectation of 30%. The net impact of the Company's updated Fiscal 2014 expectations remains in the range of its prior outlook.

Ralph Lauren is a global company that reports its financial information in U.S. dollars, in accordance with U.S. GAAP ("GAAP"). Foreign currency exchange rate fluctuations affect the amounts reported by the Company in U.S. dollars because the underlying currencies in which the Company transacts change in value over time compared to the U.S. dollar. These rate fluctuations can have a significant effect on reported operating results. As a supplement to its reported operating results, the Company presents constant currency financial information, which is a non-GAAP financial measure. The Company uses constant currency information to provide a framework to assess how its businesses performed excluding the effects of foreign currency exchange rate fluctuations. The Company believes this information is useful to investors to facilitate comparisons of operating results and better identify trends in its businesses. These constant currency performance measures should be viewed in addition to, and not in lieu of or superior to, the Company's operating performance measures calculated in accordance with GAAP.

Presented below is a reconciliation of the Company's non-GAAP measure of reported to adjusted revenues:
